

Cyber-crime rate is on the upswing, and it is affecting every organization across the globe that greatly relies on the network to communicate, collaborate and conduct business transactions. As the cyber-criminals are getting more sophisticated, the attacks are often stealthy, hard to detect and highly targeted. The attacks are no longer designed only to destroy data but are relentlessly devised to commit fraudulent transactions (by stealing identity information and services).

Realizing the implications of such malicious activities, Intellego Solutions Sdn Bhd ('Intellego') was established to assist organizations address and mitigate these risk exposures -- by providing advisory services and/or implementing advanced solutions such as Identity and Access Management ('IAM') Systems, Public Key Infrastructure ('PKI'), and other related user identification/authentication technologies (i.e smart card, token, etc). Intellego brings a fresh and innovative approach to advisory services, acting as liaison between our clients (end-user) and our technology principals/partners. While we work in a synergistic manner with our technology principals and other value-added associates/partners, our goal is to exceed the expectations of every client by offering outstanding customer service, increased flexibility, and greater value, thus optimizing system functionality and improving operation efficiency.

Our associates/partners are distinguished by their functional and technical expertise combined with their hands-on experience, thereby ensuring that our clients receive the most effective and professional service. Exceptional functional and technical expertise coupled with extensive industry knowledge makes Intellego the ideal choice to assist your organization in the implementation of your PKI, IAM and smart card/ MyKad project.
